PROFESSIONAL EXPERIENCE

MaxRemind Company   1-Dec-2023 to Present

MediRemote
- Worked on the Patient Module for MediRemote, implementing features like Patient Registration, CCM Form Design, and Categories for All Patient Records with API integration.
- Resolved critical bugs in the MediRemote Project and the Personal Health Record Project, ensuring improved functionality and user experience.

Union Health Solution Project
- Contributed to the Patient Module, including adding checks for user roles and permissions to ensure secure and role-based access control.

EMS Software (Client-Specific Solution)
- Designed and built an Employee Management System (EMS) to meet client needs.
- Features include managing employee details, tracking data and expenses, exporting records, and implementing role-based permissions.
- Developed the software using React.js with Material-UI and integrated APIs for seamless functionality.

Max Stats Project
- Developed an interactive analytics dashboard to display real-time online statistics and performance metrics using Pie Charts, Line Charts, and Bar Graphs.
- Integrated Chart.js and Recharts for dynamic data visualization and live data updates.
- Enhanced the user interface with Material UI (MUI) components for a responsive and modern design.

Communication Center Project
- Built the Email Module and implemented WebSocket API integration for real-time communication between users.
- Developed front-end components using Material UI (MUI), ensuring responsiveness and smooth user interaction.
- Improved system efficiency and reliability for instant message synchronization.

Calendar Management Project
- Implemented a Calendar Module featuring month, week, and day views using the FullCalendar React library.
- Enabled event creation, scheduling, and updates with seamless API integration.
- Designed an intuitive layout aligned with the app's overall UI/UX standards.
